Summary

For over 8 years, I owned my own business, which has given me a deep understanding of business goals and its users. Additionally, I managed coffee shops and participated in opening new spots at the major franchise company SURF COFFEE, where my primary responsibility was quality assurance and compliance with requirements. There, I learned to work in teams, improve communication, and maintain detailed documentation.

These soft skills, combined with the hard skills I acquired through education, make me a suitable candidate for the position of QA Engineer

Skills:

- Creation of test cases, bug reports, and checklists using various tools such as TestRail, TestLink, or Jira
- Testing of mobile devices on Android and iOS platforms
- API testing and automation testing with Postman
- Working with databases and SQL
- Knowledge of Scrum and Kanban principles
- Intercepting and analyzing network traffic with Charles Proxy
- Working with layouts in Miro and Figma
- Working with DevTools
